

September 2021 News Update

IFFO's monthly newsletter

Editorial

Multistakeholder initiatives are just another word for collective work and as such are as ancient as the world is. However, we may get a bit lost in the middle of all ongoing multistakeholder initiatives because they involve so many people and organisations, and sometimes rely on complex procedures. This is exactly what happens with Fishery Improvement Projects (FIPs). [...]

A feed is still only as good as its ingredients

Dr Brett Glencross shares his analysis regarding the structured and systematic way in which the **science of ingredient assessment** needs to be undertaken. He underlines five key steps and explains why they must be followed thoroughly and in the right order.

Is feed evolution driving us towards new ingredients or into circularity?

In a piece for *International Aquafeed*, Dr Brett Glencross reflects on the **evolution of feed formulations**, their environmental footprint, CO2 discharge, energy use, and reliance on land or freshwater.
