

July 2020 Update News

IFFO's monthly newsletter

Editorial

The FAO's *State of World Fisheries and Aquaculture* was released last month. I can only praise the FAO for updating the way it presents the status of fish stocks and displaying the proportion of seafood that comes from sustainable fisheries vs. unsustainable fisheries. This clear statistic will undoubtedly help focus on real issues. This is precisely what is happening with certification programmes. But why are certified volumes of terrestrial ingredients so low compared to marine ingredients? [...]
