

## UPDATE

Newsletter - October 2019

### Editorial

As the FAO's Code of Conduct, adopted by FAO member states to promote sustainable fisheries and aquaculture, will celebrate its 25th anniversary next year, we can only rejoice that it has certainly been a major inspiration in the reform process of many countries' regulations. 91% of the small pelagic fish species that are predominantly used for fishmeal and fish oil production are now "reasonably well managed or better" [...]

### Update on the use of ethoxyquin

Until a final decision on authorisation is made, i.e. between 30th September 2019 and Q1, 2020, the use of ethoxyquin for the stabilisation of fishmeals manufactured in the EU will not be permitted.
